Mahatma Gandhi rightly said, “Sanitation is more important than independence”. Swachh Bharat Abhiyan was launched by the Government of India to solve the problems of sanitation and waste management in India by ensuring hygiene across the country. The main aim of the project is to create sanitation facilities for all and provide every rural family with a toilet by 2019.

The Prime Minister of India has directly linked clean India with the economic health of the country. It is important for India to display high standards of hygiene and cleanliness to change the overall global perception people have about our country. India is home to the world's second largest population. This mission is the biggest social initiative taken up by the Government of India to enhance hygiene standards. The movement has helped in cleaning up the streets, roads, and infrastructure in many cities, small towns, and rural areas of India. High-levels of advocacy have helped in reducing open defecation and promote building household owned and community owned toilets. This has risen the hygiene and sanitation standards in the country. Even though the scenario has improved but a lot more needs to be done in terms of hygiene and sanitation. Unsafe drinking water, poor access to appropriate sanitation facilities and inadequate hand washing is a major reason for childhood illness and death globally. 11% of global child deaths are caused due to diarrhoea globally even though it is preventable.

All India Council for Technical Education (AICTE), New Delhi, has advised the Engineering Colleges to Observe Swachhta pakhwada for spreading the message of Cleanliness not only among the students but also in the surrounding areas.

As a part of it, Tirumala Engineering College conducts various programs on the swacchata mission. These programs will be conducted in every year with students of different branches under the NSS UNIT TEC. Students' active participation in various events results in inculcation of good habits and thoughts towards swacchata mission. Faculties, students of various departments cleaned gardens and roads in the campus. NSS UNIT TEC is a very strong and active unit with more than 200 members, volunteers and 3 program coordinators from various branches of engineering. NSS UNIT TEC plans various programs under the dynamic leadership of our principal Dr. Y. V. Narayana garu. Swaccha Bharath is one of the good initiatives which is implemented from its inception. Students of various branches participated and cleaned the

campus starting from main gate to main building of the college. Students actively participated in this program and they cleaned the garden near the main building, Mechanical block, basket ball court, canteen area and shuttle court. All the students and staff who are participated followed the norms of covid – 19 precautions. They wear mask and used their hand sanitizers during this process.

Principal sir explaining the importance of cleaning.
