World environment day will be celebrated on June 5th of every year. This day has its own importance that we need to safe guard the mother earth, plants, water and nature. It is the duty of every citizen on the earth to protect the above as a responsibility. World Environment Day is celebrated annually on June 5 and is a United Nations initiative for encouraging worldwide protection of our environment. The day aims to create awareness among more and more individuals to take certain actions against the growing strain on Earth's natural ecosystem. A healthy ecosystem directly means a healthy livelihood. Every organism on the planet is dependent on the environment for food, air, water, and habitat. On this day, governments, NGOs and citizens put their efforts to spread awareness above the importance of conserving the environment and negate the impact of human activity on the environment.

Tirumala Engineering College emphasizes on environment, earth, planting trees in the campus, rain water harvesting, Solar Power Plant, Organic farming, Electric battery car etc in the campus. This campus consists of many types and number of trees in the campus and looks like a green campus. The green leaves trees produces more amount of oxygen that helps in maintain good health conditions of the staff and students. Plantation is a regular program in tirumala engineering college campus. Many number of plants available in the college campus. Rain water harvesting is arranged in the college campus to save water coming for rains. Many number of environment friendly programs which are being carried out every year in tirumala engineering college campus. NSS Unit of Tirumala Engineering College is a active functional unit which is doing all the activities to safe guard the environment in the campus.
