## A REPORT ON PLANTATION PROGRAM

NSS UNIT TEC

### A REPORT ON **PLANTATION PROGRAM**

LOCATION:., SATULURU

NUMBER OF PARTICIPANTS: 32

DATE: **12-08-2021**

ACADEMIC YEAR 2021-22

## Plantation Program

Everyone knows that trees are the natural sources of Oxygen as they inhale Carbon dioxide and exhale Oxygen and without it the survival of human beings is not possible on earth. They filter harmful pollutants from the atmosphere and provide us with fresher and cleaner air to breath. Air pollution can be controlled, if we plant more and more trees. They give us fruits and leaves that serve as food for birds, animals as well as human beings; moreover we get, wood, rubber and raw materials that are used for manufacturing miscellaneous goods such as furniture, doors and a lot more .Trees are habitats of birds and animals. Many animals such as elephants, koalas, and giraffes consume leaves for nourishment. Monkeys go in for the flowers and the sweet nectar is for the birds, bats, and other insects. Like us, the fruits are consumed by the animals too which leads to another process wherein seeds are dispersed over long distances. Many animals, birds, and squirrels reside in them and are happy to dwell in the leaves-covered trees to stay away from predators.

Principal sir believes that “good health is important in concentrating on studies. Good health will come from fresh air. Fresh air will come from good number of trees. Hance. The plantation of trees is the driving force for healthy environment”. By this concept TEC periodically plans for plantation program. NSS Unit of TEC organizes the plantation programs regularly with the motivation of our principal sir Dr.V.V.Narayana garu.
